ABOUT SMART GLOBAL

Smart Global Engineering LLC is headquartered in Al Khuwair, Muscat — at the doorstep of the Strait of Hormuz and the Indian Ocean shipping lanes. From this position we serve capital-intensive operators across the Gulf, East Africa and the wider Indian Ocean basin with the machinery, equipment and spare parts they cannot afford to wait for.

Our mandate is narrow on purpose: three verticals — Oil & Gas, Food Manufacturing, and Marine — supplied end-to-end from tier-one OEMs. Every order is engineered to specification, cross-referenced to drawings and operating envelopes, and dispatched with the documentation your audit, customs, and HSE teams expect.

WHAT WE DO

Tier-one supply. Engineered discipline. Oman logistics.

Tier-One OEMs

ABB · Siemens · SKF and certified equivalents — never grey-market. Documentation and traceability with every line item.

Engineered Specs

Every part cross-referenced to drawings, materials, and operating envelopes before quotation. No mis-fits at site.

Oman Logistics

Strategic GCC port access via Sohar, Salalah and Muscat — rapid onshore, offshore and marine dispatch across the region.

Compliance First

ATEX · HACCP · GMP · ISO. Your audit trail is built into ours from PO through delivery.

ONSHORE & OFFSHORE — ENGINEERED TO ATEX

01 Oil & Gas

Rotating equipment (pumps, compressors, turbines), instrumentation and control (sensors, PLCs, transmitters), electrical systems (switchgears, ABB and Siemens drives), mechanical components (SKF bearings, valves, flanges) and ATEX-certified safety equipment. Supplied to onshore plants, offshore platforms and EPC contractors across the Gulf with the operating envelopes, certifications and traceability your asset integrity team requires.

02 Food Manufacturing

Primary processing (grinders, mixers, homogenizers), secondary processing (ovens, chillers, freezers), packaging and filling systems, IoT-enabled automation and SCADA, plus industrial refrigeration spares. Engineered for the global processed food market and supplied with the food-grade material certificates, hygienic-design documentation and FAT records audit-ready facilities expect.

KEEPS VESSELS OPERATIONAL WORLDWIDE

03 Marine

Main and auxiliary engines, turbochargers, boilers, separators and purifiers, marine electrical and automation spares, plus navigation and safety equipment — supplied to fleets in port across the Gulf and dispatched to vessels underway via established marine logistics partners. Class-society documentation supplied where applicable.

TIER-ONE OEM PARTNERS

We work with the OEMs your standards already specify. Every shipment ships with origin documentation, certificates and warranty traceable to source.

Also supplied: VEGA · Raychem RPG · Grundfos · Rittal · Eaton · FIAMM · Yuasa · Feldbinder · Megger

Three ways to reach our sales desk.

01

Direct WhatsApp

Message +968 9095 8891 with part numbers, drawings or a description. Our technical sales team replies within working hours with availability and lead time.

02

Email the desk

Send PO drafts, enquiries and engineering packs to Sales@smartglobalengineering.com. A named technical sales engineer is assigned to every account from the first reply.

03

Phone the office

Call +968 9095 8891 during operating hours (Sun–Thu, 08:30–17:30 GST) to speak directly with our Muscat desk for urgent or complex requirements.

Engineered quotation by email — typically within one business day.

Lifecycle: Brief → Source → Quote → Expedite → Deliver
